1. (2 pts) Butaclamol is a potent antipsychotic that has been used clinically in the treatment of schizophrenia. How many chirality centers does Butaclamol have? Write your answer in the box below

Butaclamol

2. (2 pts) Chloramphenicol is a broad-spectrum antibiotic that is particularly useful against typhoid fever. Label the configuration of each chirality center in chloramphenicol.

chloramphenicol

3. (2 pts) For many centuries, the Chinese have used extracts from a group of herbs known as ephedra to treat asthma. Chemists have been able to isolate a compound from these herbs, which they named ephedrine, that is a potent dilator of air passages in the lungs. Label the configuration of each chirality center in ephedrine.
